

1 SUMMARY

Title: A User Trial Study in 30 Healthy Male and Female Volunteers to Evaluate a Gel Nail Regimen Utilizing Subjective Questionnaires and Expert Visual Evaluations

Study design: Single center, monadic design

Test Article: Organic Dream Gel Regimen

Duration of study: 2 weeks

Number of subjects: Thirty-three (33) subjects were enrolled and completed all phases of the study

Type of subjects: Healthy males and females aged 18 years and older

Method: User trial study with professional application and expert visual analysis over a 14-day period with 3 visits to the test facility. All subjects completed an online Self-Perception Questionnaire (SPQ) at the final visit (Visit 3).

Conclusion: Results of the expert visual evaluations of the Gel Nail Polish Regimen at baseline showed mild chipping which reduced to 0 immediately after application, and then became mild at Day 7 and maintained that score throughout the study. Results also showed the regimen may have helped prevent cuticle cracking due to the cuticles being scored as having mild cracking at baseline and then dropping to a very mild score post application until Day 14 (before removal). The organic Dreamgel polish was also non-irritating to the cuticle with a score of 0 at baseline and then maintaining a 0 throughout the remainder of the visits, additionally there was no sign of erythema (redness) at any time point. The Dreamgel regimen results show that the regimen does not cause flaking of the cuticle by scoring significantly less than at baseline at every time point. Nail hardness was also significantly better than baseline at all timepoints. The Dreamgel Regimen supports the claim that the polish helps with the repair of the nails beginning with a moderately repaired state at baseline and improving to a healthy appearance which remained until Day 14 post product removal. The nails showed moderate ridges and lines at baseline and immediately after application, the scores improved to a healthy appearance and remained there until Day 14 post product removal. Lastly, the Dreamgel Regimen showed it did not cause yellowing of the nails based on the review of the results.

As demonstrated in the results of the 2-week Self Perception Questionnaire, the product performed highly favorably over the testing period (14 days), (Top 2 responses plus ½ neither agree nor disagree responses) with ≥80% value being regarded as highly favorable.

- 97% of subjects felt that the Gel Nail Polish regime application procedure was not time consuming
- 97% of subjects felt that the Gel Nail Polish regimen did not cause irritation
- 89% of subjects felt that the Gel Nail Polish regimen improved the appearance of their nails
- 89% of subjects felt that the Gel Nail Polish regimen made their nail appear healthier
- 82% of subjects would recommend this Gel Nail Polish regimen to friends and family

Additionally, with favorable scores being ≥70% the following results were noted:

- 79% of subjects felt the Gel Nail Polish regimen helped strengthen their nails
- 79% of subjects would purchase the Gel Nail Polish regimen in stores
- 76% of all subjects felt the Gel Nail Polish regimen helped improve their nail hardness
- 70% of subjects felt their hand and cuticles that were treated with the Gel Nail Polish regimen looked brighter

Duration of study: Study Started: 17th February 2017
Study Ended: 03rd March 2017

Location: Princeton Consumer Research Corp.
Princeton Forrestal Center
307 College Road East
Princeton, NJ 08540

10.2 Visual evaluations

10.2.1 Expert Grader

Healthy Appearance of Cuticle:

Cracking	Time point (Days)				
	Baseline	Day 0 (Post Application)	Day 7	Day 14 (Before Removal)	Day 14 (After Removal)
Mean	1.060606061	0.454545455	0.242424242	0.787878788	1.181818182

A tabulation of responses to the Visual Evaluation scores can be found in Appendix 4.

11 CONCLUSION

Results of the expert visual evaluations of the Gel Nail Polish Regimen at baseline showed mild chipping which reduced to 0 immediately after application, and then became mild at Day 7 and maintained that score throughout the study. Results also showed the regimen may have helped prevent cuticle cracking due to the cuticles being scored as having mild cracking at baseline and then dropping to a very mild score post application until Day 14 (before removal). The organic Dreamgel polish was also non-irritating to the cuticle with a score of 0 at baseline and then maintaining a 0 throughout the remainder of the visits, additionally there was no sign of erythema (redness) at any time point. The Dreamgel regimen results show that the regimen does not cause flaking of the cuticle by scoring significantly less than at baseline at every timepoint. Nail hardness was also significantly better than baseline at all timepoints. The Dreamgel Regimen supports the claim that the polish helps with the repair of the nails beginning with a moderately repaired state at baseline and improving to a healthy appearance which remained until Day 14 post product removal. The nails showed moderate ridges and lines at baseline and immediately after application, the scores improved to a healthy appearance and remained there until Day 14 post product removal. Lastly, the Dreamgel Regimen showed it did not cause yellowing of the nails based on the review of the results.

As demonstrated in the results of the 2-week Self Perception Questionnaire, the product performed highly favorably over the testing period (14 days), (Top 2 responses plus ½ neither agree nor disagree responses) with $\geq 80\%$ value being regarded as highly favorable.

- 97% of subjects felt that the Gel Nail Polish regime application procedure was not time consuming
- 97% of subjects felt that the Gel Nail Polish regimen did not cause irritation
- 89% of subjects felt that the Gel Nail Polish regimen improved the appearance of their nails
- 89% of subjects felt that the Gel Nail Polish regimen made their nail appear healthier
- 82% of subjects would recommend this Gel Nail Polish regimen to friends and family

Additionally, with favorable scores being $\geq 70\%$ the following results were noted:

- 79% of subjects felt the Gel Nail Polish regimen helped strengthen their nails
- 79% of subjects would purchase the Gel Nail Polish regimen in stores
- 76% of all subjects felt the Gel Nail Polish regimen helped improve their nail hardness
- 70% of subjects felt their hand and cuticles that were treated with the Gel Nail Polish regimen looked brighter

8	SMJ	
9	M-R	As the polish came off of my nails they feel soft to the touch but harder.
10	SMB	my nails were hard went I had the polish on, but once the polish was off, my nails were soft, weak.
11	PPW	no
12	M-H	It makes healthier looking
13	MWA	I thought 3 weeks was too long for this study. I would have liked to file my nails but couldn't because I was in the study.
14	JMR	
15	TSH	no
16	D-W	Good product overall
17	A-F	No
18	JSC	n/a
19	TAH	
20	J-M

22	JSS	
23	T-K	
24	JMH	
25	B-T	
26	SAM	no
27	HHM	
28	DEC	The gel nail polish wear was very disappointing. The polish began to lift off my nails within 4 days.
29	S-M	
30	OAO	It did not last as long as I expect a gel nail polish to.
31	DER	HAND AND NAILS WITH GEL LOOKED BETTER THAN HAND WITHOUT
32	M-S	IT CHIPPED, WOULD NOT BUY IT
33	JAR
